[Portfolio](#), [LinkedIn](#) • Cairo, Egypt

## Summary

*A front-end engineer with a strong dedication to thriving in team-oriented development. I've gained hands-on experience in various projects, refining my knack for creating user-friendly interfaces. Excited to apply my growing expertise in a dynamic and collaborative work environment.*

## Skills

- Next.js | React.js | Node.js | MERN | JavaScript | TailwindCSS.js | Python | Docker | Linux | Git

## Projects

- GamerZone, React.js, [Live](#), [GitHub](#)
- My Reads, React.js, [Live](#), [GitHub](#)

## Professional Experience

AFDVMarketing, Remote  
**Junior Full-Stack Developer**

**2023 – 2023**

Contributed to the successful delivery of full-stack projects by leveraging JavaScript and Django. Played a key role in both the development and deployment phases, actively participating in building robust and scalable full-stack applications.

### **Selected Accomplishments:**

- Developed a calendar event app showcasing upcoming events, leveraging the combined power of Django and JavaScript.
- Contributed to the construction of a Discord bot, enhancing communication and functionality within the platform.
- Collaborated on the creation of a full-stack e-commerce project, ensuring a seamless and comprehensive user experience.

Upwork, Freelance  
**Full-Stack Developer**

**2022 – 2024**

I showcased my proficiency in web development by translating design concepts into functional applications. With a focus on delivering effective, scalable, and bug-free solutions, I demonstrated a robust skill set in web development.

### **Selected Accomplishments:**

- Translated PSD designs into a responsive content calendar app using JavaScript, HTML, and CSS, showcasing strong front-end development skills.
- Integrated real-time data from an API, enhancing the app's functionality and demonstrating proficiency in API's integration.
- Collaborated cross-functionally to refine project requirements, emphasizing effective teamwork and communication.
- Seamlessly integrated a JavaScript library into a Next.js project, ensuring efficient communication, scalability, and bug-free implementation.
